

Patient Responsibility Estimator

Estimator tool fully integrated with OpenPM

Improve collections, increase revenue, and set better patient expectations

In addition to real-time eligibility verification, OPM has an estimation tool to calculate the expected patient responsibility. Use the estimator to quickly and easily produce a patient's expected out-of-pocket amount prior to scheduling an appointment, during the check-in process, or at the check-out window.

- ✓ Estimate patient costs
- ✓ Improved cost transparency
- ✓ Print and save estimates

Managing patient balances up front dramatically speeds up the cash flow and drives down the cost of patient collections.

Approximately 81% of practices have difficulty communicating patient payment responsibility

Patient Responsibility Estimation allows practices to provide an estimate of the expected patient's cost, based on fee schedules, eligibility data, procedures, and additional criteria.

PATIENT RESPONSIBILITY AVERAGED 30% OF PRACTICE REVENUE IN 2018.

- ✓ Majority of providers wait one month or longer to initiate patient collections
- ✓ It costs 4x more to collect from patients than insurance companies
- ✓ For more revenue automation ideas, ask us about POPS
